

# Split Billing

Last Modified on 03/12/2024 4:20 pm EDT

**Split Billing** allows you to divide a tuition fee, or another fee, and assign the fee to one or more **Billing Profiles**. When invoices are created, the **Payer** designated on each Billing Profile will be sent an invoice with their portion of the fee.

To accommodate split billing, **do not** add a New Tuition Fee when you enroll the child in a class. The tuition fee amount will be split in the Family Account after the child is enrolled.

## Split Billing Scenario

Griffin is 8 years old, and his parents, Kim and Brian McDonald would like to enroll him in an after-school program that's scheduled for 5 days/week for a cost of \$100/week. They have asked to have the cost of Griffin's tuition fee split 50/50 between them and to be billed separately.

In the example below, each parent will be set up to pay 50% of their child's weekly tuition fee.
