

# Add, Manage, and View Allergies

Last Modified on 12/10/2024 1:31 pm EST

Everyone who works at your childcare business plays an important role in the safety and well-being of the children under your care, and allergy management is extremely important.

The Jackrabbit Care system automatically provides a list of the top ten allergens for your convenience. However, Owners, Administrators, or Site Administrators can add additional allergens to the system at any time. The default allergens include:

Eggs	Fish	Gluten	Milk	Peanuts
Sesame	Shellfish	Soy	Tree Nuts	Wheat

---

## For an Owner or Administrator
