Create, View & Manage Programs

Programs are the top-level categories used to organize your childcare center. All classes are assigned to a **Program** when they are created. Here are a few examples of Programs you might have at your childcare center:

- Infants
- Preschool
- Before and After School Care
- Summer Session

Both an Owner and Administrator automatically have the permissions to create Programs. However, an Administrator is limited to creating Programs for the site(s) assigned to them when they are added as a **Team Member**.
