

Work with Schedules

Last Modified on 05/07/2024 12:37 pm EDT

Schedules are designated blocks of time during the day that match the classes you offer. For example, if you offer before-school care, you must create a schedule for those classes. If you offer after-school care, that requires a time schedule too! A Schedule is assigned to a class once the **class** has been created in the system. There are links on a Class page to add a Schedule, or you can manage them from *Settings (left menu) > Site Settings card*.

Owners and Administrators automatically have permissions to set up Schedules, however, an Administrator is limited to creating them for the site(s) assigned when they were added as a **Team Member**.

Expand/Collapse All

- ✔ Create a Schedule
 - ✔ Import a Schedule From Another Site
 - ✔ Add a Schedule to a Class
 - ✔ Modify an Existing Schedule
