

Create & Manage Policies

Last Modified on 09/25/2024 10:36 am EDT

Policies can be made and added as a required step during [Online Registration](#) to help gather additional information from families to make a decision about enrollment. They are then kept on the child's file for future reference. Use policies to:

-  Gather digital signatures to reduce paperwork.
-  Create agreements between families and your business before a child is enrolled.
-  Assign different policies to different Programs, based on need.
