

Create & Manage Fee Categories

Last Modified on 12/10/2024 1:34 pm EST

Fee Categories are customizable and let you organize all one-time and recurring fees into specific groups. When adding a one-time or recurring fee to a family's account, choose a fee category from the drop-down menu if it is already added or create a new one.

The [Fee Categories Report](#) displays a list of the fees that have been invoiced during a selected date range.

Fee Categories are required for one-time and recurring fees added to a family's account. However, they do not apply to class tuition fees.
